OUR MAIN MANUFACTURING PLANT HAS APPROXIMATELY
10,000 SQUARE FEET AND IS LOCATED IN THE
NORTHERN PART OF BANGLADESH.

We are proud to announce that we are one of the unique establishments that produces both Aluminium & uPVC doors and windows under one umbrella. Using the most modern production machinery & imported uPVC, as well as Imported Aluminium profiles and hardware of renowned origin, our aim is to deliver a high quality product to our residential, commercial and industrial customers.

Our first priority is client satisfaction. We care about each individual client deeply ensuring their needs and demands. In order to reach out to customers we are opening offices nationwide so that these sales offices can offer the after sales service and guarantee and warranty that we promise our customers.

Combined with suitable glazing uPVC windows can insulate interiors from sounds of up to 40 dB. This easily exceeds the recommended sound-proofing level of 30 dB for sleeping in a residential area.

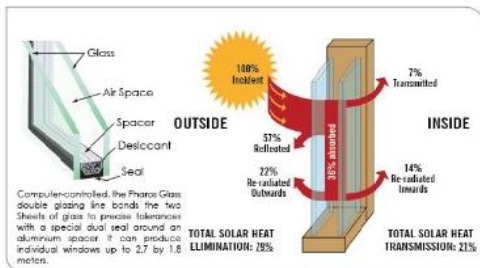

Highly effective dual compression gaskets cause tightness of Windows and Doors leading to excellent sound insulation.

Sound Insulation Table

Location And Noise Pollution Level	Recommended Max. Noise Level	Recommended Soundproofing Level of Windows	Noise Protection Class
Residential Area approx. 60 dB.	Sleeping 25-30 dB	30 dB	02
	Housing 30-35 dB	27 dB	01
	Working 35-50 dB	14 dB	00
Town Centre approx. 70 dB	Sleeping 25-30 dB	43 dB	04
	Housing 30-35 dB	37 dB	03
	Working 35-50 dB	35 dB	01
Industrial approx. 75 dB	Sleeping 25-30 dB	47 dB	05
	Housing 30-35 dB	43 dB	04
	Working 35-50 dB	30 dB	02

(dB) decibel is a logarithmic unit of measurement that expresses the magnitude of a physical quantity (usually power or intensity) relative to a specified or implied reference level.

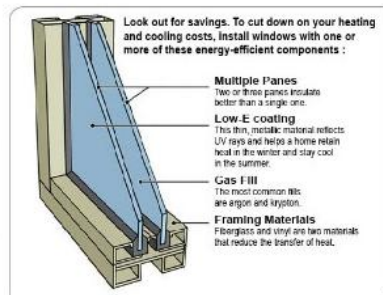

HOW DOUBLE GLAZING CONTROLS SOUND AND TEMPERATURE

By trapping air between two panes of glass the sound (noise) is reduced. It also reduces heat loss and condensation.

Whilst normal window glass is between 5mm to 8mm thick, our windows are fitted with 19mm to 28mm glass units making your windows even more energy efficient.

SAVE ELECTRICITY BILLS & REDUCE NOISE

Insulating your home is one of the best ways to make your home energy efficient. One of the key ways to save energy is through Double Glazing. Double Glazing acts as a second layer of protection for your home by keeping the coolness within during hot weather, thereby reducing the costs of electricity (air conditioning units). Single glazed windows alone can lose around 25% of your home's heat. Double Glazed windows can save a substantial amount of money (electricity bills) and 680 kg of CO2 every year, not to mention adding real value to your property if you later choose to sell.

- FIRE RESISTANT
- REDUCED NOISE
- NO REPAIR BILLS
- IMPROVED SECURITY
- MINIMAL MAINTENANCE
- REDUCED ELECTRICITY BILL
- BETTER WEATHER PERFORMANCE
- IMPROVE THE APPEARANCE OF YOUR HOME

We are offering the following services to all our customers

Free Consultation

Free Customised Designs

Free site survey with accurate measurement

Expert Installation Team

Finally, all our products come with Guarantee - 10 years on profile, 5 years on hardware.

Advantages of uPVC products:

THERMAL INSULATION AND ENERGY EFFICIENT

The uPVC Windows and Doors profile has a low thermal conductivity, which can reduce the loss of energy. They are designed with multi-chambers which also reduce the transmission of heat.

WATER TIGHTNESS

uPVC Windows and Doors profile absorbs water below 0.1%. Moreover the uniquely designed weep hole and weather strip in the meeting rail provides water resistance.

SOUND INSULATION

The multi-chambers, welded corners and tight seals offer excellent sound insulation.

TERMITE PROOF

uPVC Windows and Doors are not affected by termites.

STRENGTH AND SECURITY

All main uPVC profiles are reinforced with steel, providing a high level of security.

WEATHER RESISTANCE

uPVC Windows and Doors are exposed to scorching sun, storms, dryness, high humidity and other extreme weather changes. They do not rot, corrode nor warp. Even after many years, the windows and doors are still attractive, perfectly tight and functioning well.

MAINTENANCE FREE

The inclosed smooth surface of uPVC profiles ensures ease of clean by using gentle household detergent dissolved in water. They are also available with a foil coating in different colors, which does not need to be painted.

ENVIRONMENTAL FRIENDLY

Lead free, consumes less power while extruded and are completely recyclable due to the presence of calcium zinc stabilizer. Not only is it lead-free, but it saves energy and is 100% recyclable due to the presence of the calcium zinc stabilizer.
